

WHAT IS CLAIMED IS:

1. An ultraviolet-absorbing film comprising a fluorescent brightening agent and having a transmission of the rays of 410 nm or less of 90% or less, wherein the fluorescent brightening agent is represented by the following formula (I):

wherein R_1 and R_4 each independently represents a hydrogen atom, an alkyl group or an alkoxy group; R_2 and R_3 each independently represents an alkyl group; and [A] represents a group selected from the following formulae (a) to (k):

wherein in the above formula, R_1' and R_4' have the same meaning as R_1 and R_4 respectively; R_2' and R_3' have the same meaning as R_2 and R_3 respectively; m represents an integer of from 1 to 5; X and Y each represents an alkyl group, an aryl group, an alkoxyl group, an alkylamino group, an arylamino group, an amino group or a hydroxyl group; and Z represents an alkyl group, an aryl group, a cyano group, or an alkoxycarbonyl group.

2. The ultraviolet-absorbing film as claimed in claim 1, which further comprises an ultraviolet absorber.

3. The ultraviolet-absorbing film as claimed in claim 1, which further comprises a transparent support, an adhesive layer and a mold releasing paper.

4. The ultraviolet-absorbing film as claimed in claim 1, wherein the compound represented by formula (I) is a compound represented by the following formula (II):

wherein R_5 and R_7 have the same meaning as R_2 ; R_6 and R_8 have the same meaning as R_3 ; and n represents an integer of 1 or 2.
